OMB AT BROADCASTASIA 2009

One more year and OMB Sistemas Electronicos will be exhibiting at the BroadcastAsia 2009 in Las Vegas, Nevada USA. OMB as manufacturer of FM and TV transmitters, antenna systems, and studio to transmitter links, will be showing its newest products along with the already known in the broadcasting field where the brand OMB is already recognized.

This year OMB will be exhibiting its new MOT 2500 ATSC transmitter made up of modulator MOT 5 ATSC and 4 solid-state power amplifier S 650 ATSC, combiner and unit control.
The transmitter counts with LCD displays for parameter selection and readings as forward/reflected power, input power, power module current levels, power supply voltage levels. It also has alarms for temperature, SWR, overdrive, among the most important. It includes band pass filter and telemetry
