

PRESS RELEASE:

## **ALBIRAL LAUNCH AT NAB 2009 NEW 3G HD-SDI BROADCAST MULTIVIEWER MONITOR**

Barcelona, 24th March 2009 - Albiral Display Solutions has chosen NAB 2009 in Las Vegas as its launch path for its new 3G HD-SDI Multiviewer monitor line.

The new Multiviewer monitor line will be available in 17, 24, 37, 42, 46, 52 and 57" and will be scalable with a number of inputs of 4, 8, 12 or 16. This professional monitor line will provide 3G HD-SDI, SDI and CVBS inputs, embedded audio decoding and a totally flexible layout capability.

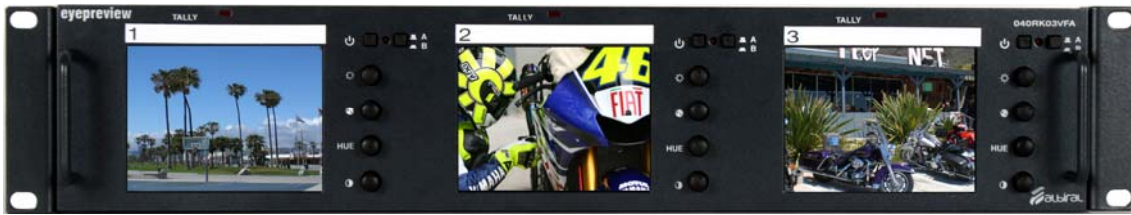

Each input will have its own DUMD (Dynamic Under Monitor Display), Soft Tally and Soft Vu-meters for embedded audio. Multicolour Dynamic Markers for group bordering of inputs will also be available.

### **Advantages of the product range:**

- Space optimisation
- Cabling optimisation
- Flexibility (layout control)
- Scalable solution (from 4 to 16 inputs)
- CVBS, SDI and HD-SDI inputs
- Ethernet controllable with loop through
- Cost-effectiveness

Furthermore, Albiral Display Solutions manufactures a large range of professional previewing monitors, ranging 4" up to 57" , all with metal cabinet and a complete range of rack monitors up to 17" , as well as desktop and viewfinder monitors.

Albiral Display Solutions is specialised in providing customised display solutions adapted to each customer specific needs.

Products to be exhibited:

- Rack monitors, analogue and SDI inputs
- Rack monitors, HD-SDI inputs
- Metal cabinet monitors, analogue, SDI and HD-SDI inputs
- Metal cabinet monitors with built in Mutiviewer
- Desktop video monitors

For more information, please come to visit us at our booth n. **SL 11.105**.

Kind regards,

The marketing team
