### COMPANY PROFILE

PROMAX is a leading manufacturer of test and measurement systems, broadcast and TV signal distribution equipment. Our product line includes measuring instruments for the installation, certification, maintenance and monitoring of cable TV, satellite TV, broadcast, wireless and optical networks.

PROMAX manufactures more than 200 different products in our Barcelona facilities. The use of the latest technological resources allows a high efficiency rate. Our ISO 9001 certification is a good proof of our compromise with quality.

PROMAX has a worldwide distribution network through a mixed network of direct and indirect sales. PROMAX has already set up 25 Calibration Centers and several other official Service Centers worldwide.

### PRODUCTS

TV Explorer HD. Unique range of TV, SAT and CATV portable signal level meters and spectrum analysers now available with MPEG-2 and MPEG-4 video demodulation for SDTV and HDTV formats.

DIGITAL TO TV distribution system can deliver TV programmes coming from different sources in the form of digital terrestrial broadcast DTT. With the upcoming analogue switch off this PROMAX system serves the needs for "digitalization" of existing TV distribution networks.

MO-180. DVB-T and DVB-H COFDM modulators now including SFN compatibility as well as high power options.

TG-140. Transport stream recorder and player.

PROWATCH DEIDE monitoring system now with video streaming capabilities.
