COMPANY PROFILE

RYMSA RF Group gathers the activities that have traditionally been the company's core competence: antennas and RF accessories for broadcast, as well as several other product lines as radar air traffic control aeriels, satellite tracking systems and specific supplies for very varied applications.

RYMSA BROADCAST OVERVIEW

Founded in 1974, we have been led throughout these years by our mission of always offering high quality solutions, which fully meet the clients' needs, until achieving the present-day position as one of the leading brands in the design, manufacture and installation of Radio and TV antenna systems, channel combiners, and a wide range of passive RF components on an international level.

PRODUCTS

New range of combiners and antennas for digital applications
