### COMPANY PROFILE

CROSSPOINT,S.A.L., established since 1993, design and manufacture UNDER MONITOR DISPLAYS (UMD) for signaling of messages, TALLY, Audio levels and Time Code information in Studios, Presentation and Control rooms and OB Vans for the Broadcast TV industry. Thousands of equipments sold in many countries, prove its commitment with the highest manufacturing quality standards.

### Products:

- UMDs with TALLY can be Static, Dynamic - names change following external commands, Tricolor or Slim, with single, double or triple message per UMD, depending on models. NEW, some UMD models also provide Video digital to analog internal conversion.
- IPAs provide 2 to 8 bar-graph level meters for analog, AES or SDI embedded audio.
- UMD Controller & TALLY matrix to interface with router/mixer and Multi-Image processors.
- COMBOs offers single or dual message and up to 8 Audio bar-graph or LTC/DVITC reading, in a single unit. Some Combo models also provide Video-Audio digital to analog internal conversion.
- CamPan, is a Remote Camera Control

System, through telephone, ISDN or TCP/IP networks.
