

KROMA EXHIBITS AT NAB2009 **PRESENTING ITS NEW EQUIPMENT**

Hall S-3 - Stand SU7305 - Date: April 20th -23rd

As the NAB2009 exhibition approach KROMA prepares to display its latest broadcast equipments in Las Vegas broadcast tradeshow. All coming to the stand located in Hall S-3 SU7305 will be able to see the newest equipment in both monitors and intercom systems. The new HD preview monitors series is aimed at HD broadcast environments where space and consumption are key factors. It is available in 4x4", 3x5" and 2x9" in 16:9 screens. This highly received series represents the perfect solution for HD OB Vans and sports productions.

KROMA bets on High Definition as the way to grow in the high quality broadcast applications, and will be displaying as on previous occasions their top HD monitors, the established LM6000 series in 8.4", 15", 17", 18.1", 23" and 46". KROMA perfectly balances quality and cost. The monitors' technical features added to a max viewing angle and the quickest response time make a splendid broadcast video LCD-TFT monitor with all advantages of flat-screen: less heat, weight and space. The 6000 series has all video inputs already implemented allowing an easy upgrade just with a password. On display as well the SD-SDI preview monitors in 4x4" and 3x5".

Introducing in NAB, the expected 3000 series in 8.4", 15" and 18.1" specifically designed for TV studios, OBs and any other broadcast application in SD environments; yet with the same high quality standards from the well-known LM6000 series. A wide choice of video inputs, along with top quality TFT panels and useful functions, make the LM3000 series the right choice for a top performing quality at entry-level price.

Also at the exhibition, the new intercom launches: digital intercom panels as well as the new hybrid intercom. This new hybrid is an expansion of the current equipment and comprises of 4 analogue ports, 16 digital and IP connections. It allows the user to adapt the system to different scenarios. The KROMA hybrid intercom is the answer to the need of multiple format integration through just one device.
