

PROMAX to showcase TV Explorer II+ analyser at Broadcast Asia 2009.

Barcelona, June 2009 - PROMAX ELECTRONICA will present an extended range of TV Analysers and broadcast equipment at the Broadcast Asia 2009 exhibition in Singapore, from 16th to 19th of June. Visitors at PROMAX's booth 7G4-07 will learn about TV Explorer family of products, and other telecommunications test instruments to provide testing solutions for cable, satellite, digital terrestrial television and fiber optics systems.

The **TV EXPLORER** range of meters have been designed for the installation, maintenance and surveillance of terrestrial, satellite and cable TV systems. It provides complete information about the channels available in a network and their quality. This includes 3 main features: Measurements, Spectrum analyser and Signal decoding

TV EXPLORER **II+** introduces many new features. It allows measuring of High Definition satellite DVB-S2 signals and DVB-H for mobile TV broadcasting. It covers Cable TV return path. It can display the constellation diagram for DVB-T/H/C/S/S2. Allows automatic measurements through the DATALOGGER function with a massive 1 GB internal memory.

Finally, visitors will learn about the latest products from PROMAX: the **SATHUNTER** designed for the installation of Direct To Home (DVB-S/S2) satellite reception systems, **PROMAX-27** DOCSIS and EuroDOCSIS networks analyser for the installation and maintenance of video and high speed data interactive services over cable TV networks, and the **Digital To TV** (DVB-T) distribution headend.

More on these and other PROMAX products can be found at www.promaxelectronics.com

PROMAX ELECTRONICS is a leading company in the area of test and measurement with a focus on information technologies and telecommunications. The product line includes instruments to install, certify, and maintain fiber optic networks, as well as baseband services such as MPEG2, and broadband services such as Cable TV, satellite, and digital terrestrial television. The company was founded in Barcelona in 1963 and at present has a wide sales network with calibration services in several countries.
