

## **SAPEC will exhibit its new decoders and features for its professional products at NAB**

**SAPEC will showcase the new decoders for MPEG 2 HD, and H.264 new features such FEC(forwarding error correction) for its current products**

**Madrid (SPAIN) (2009-march-16).-**

SAPEC a Spanish company specialized in professional solutions for the transmission of video and audio signals will demonstrate its products at the NAB SHOW at South Upper Hall Stand SU-7323, that will be held from April 20-23, 2009, at the Las Vegas Convention Center.

Will be presented the new professional decoders XAVIC XVD H.264 and XAVIC XHD MPEG2 HD, for applications such distributions networks, direct ENG/SNG connections, IPTV and others applications.

*“We are very pleased to maintain our investment in R&D, we are working very hard in the H.264 and HD equipments, with the new decoders working together with our encoders we guarantee the quality of video and audio in contributions, distributions and other application, the market is already demanding these products and we are ready to delivery professional products for high demanding professional applications”* said Mr. Mr. Jose Manuel Lopez, Sales and Marketing Director at SAPEC.

Also will be show new features for the current generation of the SIVAC MPEG 2 SD encoders and decoders, such:

- FEC (*Forward error correction*), with enhanced performance for the decode process.
- Internal multiplex to work as Radio and TV encoder on the same equipment.
- Editable DVB-SI.

**SAPEC is a Spanish company focused on the design, manufacturing, sales, integration and installation of advanced video and audio transmission systems MPEG-2/MPEG-4 over any existing network for Telcos and Broadcasters.**

- Auto management 1+1 protocol.

All this updates will be available by software updates for the current products

*“SAPEC is working really hard in the internationalization plan, and NAB was an important event in this plan in the last years, the event provided us the right platform to showcase our new products in the most effective manner to thousands of trade visitors from America, Europe and Asia. We believe our new products and features will have a good reception in the show as we have a highest level of sophistication, precision and technological excellence for professional Broadcast Products. We are really proud to be present at this year edition of NAB and we are confident all our investments in R&D will make us well-positioned in the global market”* concluded Mr. Jose Manuel

XAVIX HXD H.264 Decoder
