

NAB is considered to be the most important annual fair of the audio-visual sector in the whole world and for Seratel it is an excellent opportunity to know the new trends of the market and to be able to develop new opportunities of business.

As so many other years behind, Seratel will be present as Spanish company manufacturer of FM's transmitters and attached products. Concretly in the stand N8425, where we will be charmed of attending the needs and requirements of the visitors.

There we will present our principal products (FM Transmitters 20 w - 20 Kw, Stereo Encoders, Analog and Foxglove Exciters, FM Turn Key Projects, Gsm Transmitter Supervision Systems, Activates Up reserves solutions, Antennas, Filters, Diplexers, Combiners, Radiolinks, Remotto Pick-, Stand - by generators, solar energy systems) which dominate the constants in our design and manufacture as simplicity, reliability and performance(yield). On the other hand, we will take profit of the opportunity of presenting a new innovation developed by our personnel " the universal valid plate of communications for all the formats. "
